## About your antibiotic record card

- Your antibiotic record card keeps a list of antibiotics you have taken, what they were taken for and whether they were effective
- Your antibiotic record card helps your doctor decide whether antibiotics are the right medicine for you when you are ill
- Your antibiotic record card reminds your pharmacist what antibiotics you have taken
- Your pharmacist will use the information on your antibiotic record card to talk with you about the antibiotics they give you

## Your local pharmacy is working to prevent and control antibiotic resistance
